/ ALL ABOUT ME

I'm a 33 year old Swedish multidisciplinary developer working in the cross section of aesthetics and technology. I help clients with tailor-made developments, based on concrete concepts and sophisticated user centered experiences, into real business results. With more then 3 years experience in the industry, I'm focusing on front and backend development with a personal preference for the MERN stack (MongoDB, Express.js, React, Node.js), user experience and brand identity.

/ SELECTED WORK EXPERIENCE

>> Frontend Developer
Snap | May 2022 - Nov 2022

Worked on migrating the frontend of the legacy Snap page to a modern Next.js / Typescript application. Responsibilities included creating px perfect conversions to code, implementing and testing various CMS solutions, writing various logic of the system etc.

>> Backend Developer
Keller Mortgage | Jan 2022- May 2022

Developed and maintained the backend architecture of Keller Mortage, an integrated homeownership experience company that plays an important role in bringing both agents and their clients an integrated home buying experience by offering a seamless lending experience.

>> Backend Developer
Keller Covered | May 2021 - May 2022

Developed, troubleshoot, debugged, tested and refactored the backend of the Keller Coverage marketplace that helps homebuyers and homeowners purchase and choose insurance plans tailored to their needs.

>> Fullstack Developer
Freelance | 2019 to present

Developed websites and e-commerce solutions for various international clients.

/ EDUCATION HISTORY
